Although presently working women are more educated and qualified and doing better in every field than ever before, yet men have always and still take over the corporate world. In

this book, Katty Kay and Claire Shipman argue that the key factor between this discrimination and domination is confidence. The authors provide research in gender, behavior, genetics, and cognition - with instances from their perspectives and personal experiences and from women who are in the political, business, or media field. They provide the motivation and recommend that women need to end the gap and accomplish the career they desire and deserve.

The Confidence Gap - Russ Harris

5 Books to Improve Confidence | Boost your confidence level (**The Confidence Gap**)

This book presents how your institutions fail to develop the mindset of developing self-confidence. You are allowed to dream, you have a lot of dreams, but if you do not have that faith and belief in you that you can achieve it, you will never be able to achieve it. You can only be successful when you have your dreams and goals and you are ready to work for them to make them happen.
