Ladon

Ladon

Ladon, one of DC's most daunting dragons, gained immense popularity after his appearance alongside the formidable Daughters of Atlas in *Shazam! Fury of the Gods*. Despite being the guardian of the Golden Apples in the Garden of the Hesperides, Ladon's limited comic appearances in the past failed to showcase his true potential as a menacing character.

However, in *Fury of the Gods*, Ladon's depiction as a wooden dragon emitting a mythical blue flame from every pore of his body instills a sense of terror in the audience. This is a significant departure from his earlier portrayal, where he was mostly shown in the background of the Garden of Hesperides. Hence, Ladon's character in *Fury of the Gods* is a far more powerful and awe-inspiring rendition than his previous depictions in the comics.

Typhoeus

For ages, Zeus had imprisoned Typhoeus underneath Mount Etna in Italy, but Wonder Woman ultimately liberated him while serving Hecate. Nonetheless, her mission was not without challenges as Ares, who also desired to claim Typhoeus as a trophy for the Greek Gods, battled her.

To achieve this goal, he manipulated Bruce Wayne's life and orchestrated events to create Batman. Barbatos commands an army of Dark Knights and possesses extraordinary reality-altering abilities, which make him one of the DC universe's most potent dragons.

During the Dark Nights: Metal event, Barbatos shared some of his sinister intentions for Batman, but he was not the only noteworthy dragon featured in the crossover. Fans were surprised when Batman rode into combat on a Joker Dragon.

Barbatos had called upon the Joker Dragons from the Dark Multiverse to assist The Batman Who Laughs and his Dark Knights.
