As Gotham's district attorney, Dent was one of Batman's earliest allies. However, an unfortunate incident led Dent to become Two-Face, an infamous Gotham villain. Despite this transformation, their shared past often leads to unusual alliances.

One such significant collaboration is in the "Batman: Face the Face" storyline. Following the "Infinite Crisis," Batman leaves Gotham for a year and entrusts the city's safety to Dent. Forced by circumstances rather than Ivy's usual mind-altering tactics, Batman and Poison Ivy found themselves on the same side. Together, they battled to counteract the devastating effects of Scarecrow's fear gas that had been unleashed on Gotham City.
