Our Perspective

It is evident that we all die one day and there is no coming back. Many may talk about the soul or rebirth thing but even there we lose our body, current identity and life & family. Getting out of the philosophical and spiritual realm. Death is not something that's rare, it's constant. Everyone has to die someday, we can't avoid it. So, instead of focusing on how to

avoid death, we should focus on how we can use what we have(life).

The first part of the quote is quite clear but the second part can be very vague, depending upon your understanding. But on surface level the quote means to transform your life into something that will be remembered forever after you are gone. The quote focuses on making your life worth it. Live your life in such a manner that it has some significance even after your exit from the world. Or it can even be translated into doing something which has great value attached to it. Which roughly means your work speaks for you. Like giving some equation, quote, book, idea, business that is remarkable or contributes to the world or humanity.

But if you go deeper into understanding the quote and reading between the lines, the quote's second part can have different meanings all together. Every person has a different meaning and perspective in life. Even our meaning of success differs. And there can't be one

There are an infinite number of possibilities and thought processes. All depends on an individual's point of view, situations, struggles and choices & priorities in life.

Conclusion
